

The Ultimate Reel Checklist

A framework to evaluate your short-form content for maximum retention and algorithmic distribution.

1. The Critical **Hook** (0-3s)

- **Visual Hook:** Start with the most striking element immediately (e.g., final polished result before BTS).
- **Text Hook:** Add bold, on-screen text in the first frame stating exactly what the viewer will get.
- **Audio Hook:** Audio must start immediately. Absolute zero silence allowed.
- **Zero Buildup:** Aggressively cut out slow panning, static shots, or any "dead air" at the start.

2. Pacing & Stimulation

The 2-Second Rule

Ensure something changes every 1-2 seconds. Use camera angles, zoom, text pop-ups, or sound effects to retain focus.

No Dead Time

Relentlessly cut all pauses, slow movements, and unnecessary steps. Keep the visual momentum high.

Fast-Forwarding

Condense long processes (like physical setups or builds) using time-lapses or strategic high-speed clips.

Value Check

If a specific clip doesn't add new information, clear value, or visual interest, cut it out entirely.

3. Narrative & Payoff

The Process (3-12s)

Show fast-paced, visually interesting behind-the-scenes clips that explain "how it works."

The Setup (0-3s)

Deliver the hook immediately. Combine the final image or most engaging visual with a clear text promise.

The Payoff (12-15s)

The final reveal. Deliver the result quickly without making the viewer wait or dragging out the buildup.

4. Looping & Retention

Visual & Audio Continuity

Make the final frame of the video visually similar to the first frame. Combine this with an audio track or voiceover that loops perfectly from the end back to the beginning to create an unnoticeable transition.

The "Rewatch" Trigger

Intentionally place a crucial piece of text on screen for slightly too short a time, or add a quick visual Easter egg. Viewers will often rewatch the Reel specifically to catch what they missed.

5. Quality & Shares

- **The "Send" Factor:** The content must be surprising, uniquely impressive, useful, or relatable enough that someone will DM it to a friend.
- **Clean Export:** Ensure your video has zero compression blur. Export in 1080p at a solid bitrate (e.g., 16Mbps).
- **Platform Native:** Ensure no TikTok, CapCut, or external watermarks are visible, as algorithms penalize them.

'' If your Reel has a slow intro, unclear purpose, long setup, or repetitive visuals—it will be skipped. ''

THE BRUTAL REALITY OF THE ALGORITHM

Ready to Upload?

Review this checklist before every single export.
